

MR Daly

Reference is made to attached letter dated 18 Sept 51. Receiving spools used for microfilming film by this agency are metal and from all surveys made by this office plastic spools are not in existence.

Insofar as pertains to (Key not on 16mm) this device is also known as "film sort" and MR

STAT

 has spoken to me about the possibilities of its use in the agency. He further stated that he has made inquiries relative to this new system, with ~~representations~~ commercial vendors who mfg the item.
